

# BROST<sub>co</sub>

## BRAND IDENTITY SYSTEM

Precision. Authority. Restraint.

A premium visual system built around the approved BROST CO wordmark.

## 01 LOGO SYSTEM

# The wordmark is the brand.

Use the supplied artwork exactly. The BROST letterforms and CO placement should never be re-created with typed text.

BROST<sub>co</sub>

PRIMARY | CHARCOAL + GOLD

BROST<sub>co</sub>

INVERSE | WHITE + GOLD

## MONOCHROME VARIANTS

BROST<sub>co</sub> BROST<sub>co</sub>

# Quiet luxury, controlled contrast.

**CHARCOAL**

#242424

**GOLD**

#B28F5D

**IVORY**

#F7F4EE

**STONE**

#D8D2C7

**WHITE**

#FFFFFF

Recommended balance: 70% white or ivory, 20% charcoal, 10% gold and stone accents.

Gold should signal importance, status, or brand emphasis. Avoid using it as a large background field.

Editorial authority meets operational clarity.

# GFS Didot

Display typography for premium headlines, campaigns, and selective brand moments.

---

## Inter

Primary UI and body typeface for forms, dashboards, procurement data, tables, and long-form copy.

### EXAMPLE

Procurement, executed with precision.

Clear hierarchy. Controlled contrast. Minimal visual noise.

# A compact mark built from the approved B.

## USE FOR

Favicon and browser tab

App icon and PWA icon

Social profile image

Compact navigation state

Watermarks and document stamps

## IMPORTANT

The B mark is extracted from the exact approved logo. Do not substitute a typed B.

# Protect the details that make it feel expensive.

- 01 Do not retype or regenerate the BROST wordmark.
- 02 Keep the CO gold, smaller, and in its approved lower baseline position.
- 03 Do not stretch, condense, rotate, outline, shadow, bevel, or add gradients.
- 04 Use white or ivory for primary light applications and charcoal for dark applications.
- 05 Keep clear space around the logo equal to at least the cap height of CO.
- 06 Use the B mark only when the full wordmark would be too small to read cleanly.
